

ZKSL800/1500AC

ZKSL800/1500AC is a Motorized Sliding Gate Opener designed for heavy duty industrial commercial sliding gates up to a maximum of 800/1500Kg in weight. The durable and reliable motor made by pure-copper wire brings a superior performance. The durable system provides a long operating life with minimum maintenance requirement.

Suitable for all types of sliding gates, and perfect for driveway gates made by steel, wood, vinyl, and shaped as tube, panel, and chain-link. Typical application includes residential, commercial, and courtyard. Easy DIY installation with commonly available tools, no extra welding. The steel gear rack, full mounting hardware and easy-to-follow instructions are included for your peace of mind. The whole installation takes just a few hours.

During power outage, it can release motor control and realize manual door opening. The ZKSL800/1500AC with a variety of functions, it can automatically close the door according to the set time after opening the door, and realize slow start and stop through the intelligent control board.

Features

Reliability

- ZKSL800/1500AC Motorized Sliding Gate Opener meets the highest standards in safety
- High quality AC motor
- Simplify structure and connection, easy to maintain.

Multi-function

- External alarm lights, infrared devices and other safety equipment.
- Access control system can be connected to realize automatic identification and access control.

Specifications

Model	ZKSL800AC	ZKSL1500AC
Power Requirements	AC220V/50Hz	AC220V/50Hz
Max Weight	800kg	1500kg
Running Power	370W	550W
Output shaft height	50mm	
Opening Speed	11-13m/min	
Limit way	Dial spring and magnetic steel	
Noise	≤60dB	
Working temperature	-20℃-70℃	
Dimension	271*228*280 (mm)	
Dimension with packing	345*285*360 (mm)	
Weight	13Kg	15Kg
