

ENS-CLEAN

Kimtech™ Gold TMSCIENCEKIMWIPES Low dust wiping paper (small single layer), white.

KIMTECH RSCIENCEKIMWIPES low dust wiping paper has been the standard equipment for precision wiping processes such as laboratory instruments, special parts and precision instruments for 60 years, and is recognized as the world's leading brand in the field of precision wiping

Product Feature

- 1) The use of LINTGUARD anti-static film effectively prevents the generation of static electricity and dust, saving a lot of wiping time, improving accuracy and efficiency.
- 2) 100% original wood pulp with special processing technology, pure texture, efficient water absorption, improve the use efficiency, save working time.
- 3) The paper is fine and has good wet and dry strength, tough and durable, and is not easy to be damaged. It will not scratch the surface of the swab during use, which can effectively reduce the use cost and improve the production quality.
- 4) Multi-specification design, to meet individual needs, with a variety of optional specifications, can effectively meet the different needs of different scenarios, truly from the user's point of view, for the sake of users.
- 5) Professional certification, reliable quality to be trusted. Pass the ROHS "Restriction of the Use of Certain Hazardous Substances in Electrical and Electronic Equipment Directive" test, pass the anti-static test.

Material :Wood pulp fibre

Color :White

Size 11.0cm x 21.3cm
