

2025 LIGHTING PRODUCT GUIDE

| MARINE | TERRESTRIAL | DOCK & DECK | CUSTOM/SPECIALTY APPLICATIONS | DIGITAL LIGHTING CONTROL |

A photograph of a ship's deck at sunset or sunrise. The scene is bathed in a warm, golden light from the low sun on the horizon. In the foreground, a white metal railing with a dark track runs diagonally across the frame. To the left, a white structure, possibly part of the ship's superstructure, is visible. The background shows the calm sea meeting the horizon under a clear sky.

| PERFORMANCE | RELIABILITY | QUALITY |

Lumitec is an engineering and design firm solely focused on the conceptualization, development, and manufacture of high-quality extreme environment LED lighting. Our LED fixtures are designed with an in-depth understanding of each light's application and use environment. We leverage this knowledge among our team of highly skilled engineers and designers working in our state-of-the-art LED R&D facility to deliver leading-edge innovation, best-in-class performance, exceptional reliability, and unsurpassed quality.

Digital Lighting Control

Lumitec's Poco Digital Lighting Control is a powerful, cost-effective onboard lighting control solution. It provides fingertip touch control of Lumitec PLI-enabled lights through a compatible MFD or connected smart device via a simple, easy-to-install control module.

Expandable through the incorporation of Pico Modules, the Poco system offers the same level of sophisticated lighting control previously found only on high-end yachts.

Poco 4 Module
3.5" W X 5.5" H X 1.25" D

Poco™ Digital Control Module

Poco Digital Lighting Control delivers powerful, low-cost, on-board lighting control through a compatible MFD or connected smart device in a simple, easy-to-install control module.

Poco 4 is the latest iteration of the award-winning Poco system and introduces new innovative features such as intelligent sound-to-light, NMEA 2000 compatibility, and CAN bus integration. When installed with Lumitec's PLI-enabled lights, even more functionality is unleashed – precise control over color selection and intensity, custom lighting scene creation with interactive sound-to-light, and the ability to add 'virtual circuits' on a single channel, allowing aftermarket installers to add lights and improve on-board lighting designs without adding any additional wire runs.

Poco Digital Lighting Control Module

SKU	Description	Channels	Voltage	Max Amps
101925	Poco 4 Digital Lighting Control Module	4	10-30vDC	10A/ch

The Poco Digital Control Module can be controlled through a compatible MFD or connected smart device (not included).

Pico™ Expansion Modules

Pico Expansion Modules are designed to expand the capabilities of the already powerful Poco Digital Lighting Control system. There are currently four modules available.

Pico C4 - Provides TTP functionality or Poco control of third-party RGB or RGBW lighting accessories such as lighted speakers and LED boat lettering. Max load of 2.5A.

Pico C4-MAX - Similar function to the standard C4 but with higher output and incorporates a low current signal wire control to reduce the load on the Poco channels. Max load of 10A.

Pico S8 - Provides the ability to assign Poco virtual switch commands to mechanical switches (8 max). Physical switch will activate the virtual switch command through the Poco module.

Pico OHM - Provides efficient Poco-only control of third-party RGB lighting accessories (no TTP). Connects in-line at RGB accessory, max load of 400mA. Sold in packs of four (4) modules.

SKU	Description	Voltage	Max Amps

101829	Pico OHM Module (4 pack)	10-16vDC	400mA

Flood & Specialty Lighting

Lumitec offers an unbeatable lineup of flood lighting solutions, from versatile, positionable spreader lights to sleek, compact deck lights and powerhouse, commercial-grade work lights. Built to survive in the harshest of marine environments, these lights are engineered for maximum durability and performance.

Capri2

The Capri2 flush mount spreader lights have been the benchmark for OEM manufacturers for many years, offering exceptional reliability and performance.

The single color is the perfect cost-effective solution, with fewer features yet solid and dependable. In contrast, the feature-rich dual-color option offers Poco system compatibility, either red or blue second color, and is dimmable. Compatible with PWM** LED dimmers. IP67 compliant.

**Capri3/Caprera3**

The Capri3/Caprera3 builds on the huge success of the Capri/Caprera line of spreader lights. Now, with 1,200 lumens, a smaller, more thermally efficient powder-coated die-cast aluminum housing with improved optical beam pattern and no exposed fasteners on flush mount lights. But the innovation doesn't stop there; Capri3 has our innovative easy fit butterfly clip mounting system to greatly simplify the installation process. Capri3/Caprera3 is IP67 compliant, and PLI enabled (Poco compatible) on many models.

Maxillume h60

From the world's top custom yacht builders to the US Coast Guard, customers with high expectations rely on the Maxillume h60 flood light. Packing more than 6,000 TRUE lumens[†] (dimmable), the h60 is available with two mounting options and our tried and tested internal dimmer control. Each light is completely water-sealed (IP67 compliant) and rigorously tested for shock and vibration. The h60 is PLI enabled (Poco compatible) and has a 3-wire configuration (additional orange signal wire).

Maxillume h120

The Maxillume h120 has set the standard in DC-powered deck/work lights. Delivering more than 12,000 TRUE lumens[†] (dimmable) and housed in a heavy-duty, powder-coated, die-cast aluminum housing. The polished 316 Stainless Steel bracket on the trunnion mount version offers maximum flexibility for positioning and will ensure the light stays put through rigorous vibration and shock. The h120 is PLI enabled (Poco compatible) and has a 3-wire configuration (additional orange signal wire).

Maxillume tr150

Rugged, reliable, with 20,000 TRUE lumens[†] - the Maxillume tr150 will change how you work at night. Rock solid reliability and a durable powder-coated, die-cast aluminum construction, guarantees light when you need it. Your crew will be safer, faster, more effective, and more productive. Completely sealed to IP67 standards and tested to military specifications for shock and vibration. The Maxillume tr150 is the new standard for 200W LED spot/flood lighting.

Razor™ Light Bar

Sleek, streamlined, and powerful, Razor is specifically designed for marine applications. PLI enabled (Poco compatible) with a 3-wire configuration, the Razor Light Bar is designed to be easily integrated into most existing hardtop, arch, and pilothouse designs, or it can surface-mount directly to unmodified hardtop surfaces for an equally clean look. But don't let the small footprint fool you; Razor packs a punch with over 10,000 night-piercing lumens of dimmable light. Available in two beam patterns, spot, or flood with a choice of a white or black finish.

Introducing The Illusion Series™

The Illusion Series is our latest family of products guaranteed to add a new level of sophistication and refinement to the Lumitec line up. Designed to have an ultra-thin profile with a seamless clean look, Illusion Series products incorporate state-of-the-art industry-first materials and manufacturing processes. This unparalleled flexibility adds a new level of customization capable of meeting the needs of the contemporary design style and color palettes of today's boats.

Unique in styling and highly versatile in appearance, the Illusion Down Light will launch this series with a courtesy light and spreader light option to follow.

Illusion™ Down Light

Sleek and stylish with an ultra-thin bezel-free design, the Illusion Down Light provides a seamless flush mount integration on hardtops, arches, and salon ceilings. Boasting chemically hardened wafer-thin glass with a shorter mounting depth than the Mirage, Illusion retains the convenient butterfly clip mounting system for no exposed fasteners. The Illusion Series Down Light will include a new "Sound-to Light" synchronization feature when paired to a compatible Poco module. Color output options will include warm white/spectrum, cool white/spectrum, and single color warm and cool white output. IP67 compliant.

Down Lighting

Delivering incredible output with profiles that are among the slimmest in the industry, Lumitec's Down Lights remain the best-performing products in the category. IP67 rated and completely sealed, making them perfectly suited for a variety of indoor or outdoor overhead lighting needs. Enhance textures and surfaces with output options that include architectural-grade High CRI warm white and full-color RGBW Spectrum, offering nearly infinite output color possibilities.

Orbit

Orbit Down Lights stand apart from the crowd with a shallow-depth profile (less than 1/2" mounting depth) and a secure composite mounting system. The lights are ideal for a variety of indoor and outdoor uses (IP67 compliant).

The Orbit Retrofit Kit covers oversized holes (1.875" to 2.750") from old style halogen lights. The ingenious clamp-in design has no exposed fasteners for a clean look inside and out.

Mirage/Positionable Mirage/Square Mirage Flush Mount Down Lights

The Mirage Down Light series remains the best-performing down lights in the category. Delivering incredible output and a profile that is among the slimmest in the industry. Completely sealed and IP67 rated, it is perfectly suited for a variety of indoor or outdoor overhead lighting needs. Output options include architectural-grade High CRI warm white, white/blue/red multi-color, and RGBW Spectrum, offering nearly infinite output color possibilities.

The Mirage series includes positionable (gimbal) and square models. The Positionable Mirage offers up to 30 degrees of pivot for wall wash, art lighting, and other dramatic lighting effects. The Square Mirage blends harmoniously with today's more contemporary and forward-thinking designs. All boast Mirage's industry-leading output, features, and contemporary good looks.

Courtesy & Accent Lighting

With a reputation for reliability and performance, Lumitec Courtesy Lighting has set the benchmark for accent lighting. Offering both single-color and full-color output, surface or flush mount options, and a variety of housing finishes, our lights are the standard for quality and versatility.

2" W. X 1" H X 0.43" D

Also available with white or black housing

Fiji Full-Color Courtesy Light

Fiji, our first full-color, 2-wire courtesy light, is designed to be used in conjunction with a Poco module to provide unlimited color options at your fingertips (no TTP available). Fiji has a small footprint, no exposed fasteners, and an attractive contemporary design. Available with a direct or indirect light beam pattern and a choice of white, black or stainless-steel finish. IP67 rated.

Courtesy & Accent Lights

Small, attractive, and discreet, these accent lights offer more light output than many "full-size" overhead lights. All measure about 1" in diameter or less. Echo is clean, almost flush, and easy to install. Andros and Aruba offer a wide, bright indirect beam. Exuma and Barbados are surface mount and fit almost anywhere. All are suitable for interior or exterior courtesy and accent lighting needs. Fully sealed, IP67 compliant. Not compatible with Poco module or 24 vDC systems.

Utility Lighting

The unsung heroes of the lighting world, utility lights provide much needed functionally. Lumitec offers a wide range of utility lighting products, from engine room and compartment lights to full-color under gunwale lighting that are guaranteed to complement any lighting configuration.

TOP EMITTING

Moray Flex Light - With Integrated Lighting Controller

The Moray Flex Light is the only RGBW marine flex light to have an internal color output controller. This means that Moray can be connected directly to a 2-wire DC electrical system, allowing for color and dimming control with any standard on/off switch, with no external driver required. PLI enabled, Moray is also compatible with our Poco Digital Lighting Control system for advanced color control through an onboard MFD or smart device via a connected Poco module. Available in eight convenient sizes, Moray is a versatile and reliable flex light solution that will reduce wiring cost, time, and complexity.

Anywhere Light

Where can you use a light that is attractive, bright, small, completely sealed, and withstands the elements yet blends with well-appointed interiors? Well, anywhere! This surface mount light is constructed with a quality aluminum housing and is completely water sealed to withstand the elements. IP67 compliant.

Nevis2/NevisLT

Engine Room Light

With more than 1,000 integrating sphere tested lumens†, the Nevis2 and NevisLT douses hard-to-light areas with a 180-degree spread of bright, even light. Available in white/red or white/blue and certified as ignition protected, Nevis is completely sealed, IP67 compliant and compatible with most PWM** LED dimmers. Nevis - still the original, still the best!

Zephyr Spreader/Deck Light

The Zephyr spreader light is equally well suited to lighting the fore-deck of an elegant sloop or the cockpit of a sport yacht. Mounted on spreaders, spars, radar arches or towers, and fly-bridges at a mounting height of 16 feet, this spreader light brightly illuminates an area nearly 24 feet in diameter with more than 1,000 lumens†.

Perimeter Light

The Perimeter Light is versatile, attractive, and powerful. With more than 1,000 true lumens† and an optical system designed to spread light very widely and evenly; it is uniquely suited to various specialty applications. Aluminum housing and impact-resistant plastic window means years of trouble-free service, even in the most extreme environments.

Underwater Lighting

Renowned globally for unmatched performance and reliability, Lumitec's underwater lighting sets the industry benchmark. With a diverse product lineup, a legacy of innovation, and an unwavering commitment to quality, Lumitec continues to lead the way—setting the standard for years to come.

On The Horizon - SeaBlazeX3™

The all-new SeaBlazeX3 is shaping up to be our most groundbreaking underwater light yet. Boasting an estimated 7,000+ lumens and a sleek design that's up to 50% thinner than the X2, this cutting-edge light is ready to redefine the industry. Featuring a newly designed emitter array and the game-changing Intelligent "Sound-to-Light" capability (when paired with the Poco 4 module), the SeaBlazeX3 offers an unmatched lighting experience. It maintains the X2's durable bronze construction and hole pattern for seamless upgrades, while advanced design and production methods make it our most reliable underwater light to date.

SeaBlazeX2™

SeaBlazeX2 continues the legacy of the phenomenally successful SeaBlazeX series. The dual-color SeaBlazeX2 offers an internally synchronized white/blue crossfade mode as well as white or blue color output. The Spectrum offers a nearly limitless palette of intense, vivid colors complemented with a relaxing color cycle mode. Both versions deliver more than 6,000 lumens, easy surface mount installation, require no external drivers, Poco digital lighting control system compatibility, and a pedigree of reliability recognized the world over. SeaBlazeX2 is available with a bronze or polished finish option.

SeaBlaze™ Typhoon

Through-Hull Underwater Light

Typhoon sets a new standard for performance, reliability, and value in through-hull underwater lighting. Delivering more than 10,000 measured lumens (white) and a modular quick-change design for easy in-water service and upgrades. An innovative internal relay simplifies wiring and significantly reduces installation costs and complexity. Solid bronze housing requires a 3" mounting hole (3.625" flush mount). Full-color control using any standard on/off switch or use Lumitec's Poco Digital Lighting Control (sold separately) for even more advanced features.

Javelin600X

Style and performance unite to create the Javelin 600X underwater light. Designed for high-performance boats, the Javelin 600X is constructed from a solid naval bronze housing with a proprietary plating process for a brilliant high luster finish. Leveraging the same "smart light" technology found in our market-leading SeaBlazeX2 series - Javelin offers the same high performance, full-color RGBW output, simple surface mount installation, and the ease of operation only found in Lumitec products. PLI enabled and fully compatible with our Poco System.

SeaBlaze™ Quattro

The SeaBlaze Quattro leverages the technology of its big brother, the SeaBlazeX2, in a more cost-effective package. Quattro boasts more than 2,000 lumens, includes a crossfade and color cycle mode, and is constructed of marine-grade bronze housing with heat-tempered glass. Available in dual-color white/blue or dazzling full-color Spectrum output. The SeaBlaze Quattro is the new standard for high-performance value in underwater lighting.

SeaBlaze™ Mini

SeaBlaze Mini packs a surprising punch! Leveraging many of the technologies utilized in our market-leading SeaBlaze series, ensuring years of trouble-free service. Available with a full-color Spectrum (750 lumens*) option that is Poco System compatible, there is simply no better value in underwater lighting. SeaBlaze Mini and SeaBlaze Mini Spectrum are perfect for smaller trailer boats, skiffs, or dinghies. Single-color lights are sold as a pair.

Zambezi X2™

Surface Mount Underwater Light

The most powerful option of the Zambezi™ Series, the Zambezi X2 outputs over 6,000 lumens and is compatible with our award-winning Poco Digital Lighting Control system, providing advanced color control via a compatible MFD or connected smart device (Poco module is required). Choose from two color output options, brilliant dual-color white/blue or dazzling full-color Spectrum output. Perfect for mounting on typical transducer/accessory brackets.

Zambezi™ Quattro

Surface Mount Underwater Light

Zambezi Quattro is the perfect combination of output and value for larger pontoon boats, aluminum skiffs, and floating docks. Choose from white/blue dual-color or the vivid full-color Spectrum output, each delivering more than 2,000 lumens and stunning color. Completely sealed with no external drivers. Self-isolating from metallic mounting surfaces to prevent galvanic corrosion. Perfect for mounting on typical transducer/accessory brackets.

Zambezi™ Mini

Surface Mount Underwater Light

Perfect for smaller pontoons and skiffs, Zambezi Mini is small, easy to mount, easy on the wallet, yet packs a visual punch. Choose single-color or full-color Spectrum. Color selection is simple and can be controlled from a standard power switch, or pair with a Poco module (sold separately) for advanced color control through an onboard MFD or connected smart device via the Poco app.

Newt

Livewell/Utility Light

Small, convenient, and extremely durable, the Newt is the go-anywhere, fully submersible utility light. Perfect for livewell and splashwell locations, Newt provides just enough light where you need it most. Available in four single-color output options, the Newt is the cost-effective solution for all wet area locations. Completely water sealed, IP68 compliant. 12vDC system only.

Navigation Lighting

Lumitec's innovative approach to navigation lighting sets us apart from the competition. From compact, sleek inset and drop-in nav lights to the slimmest masthead and anchor lights on the market, we are constantly rethinking and redefining what navigation lighting can be.

Available in 39" with a White or Black Finish

Angler Motorized Base

CONTOUR™
SERIES

Masthead 360 All-Round Anchor Combo Light

Stylish and sophisticated the Contour Masthead 360 All-Round Anchor Combo Light takes masthead combo lights to a whole new level. An innovative approach to the design dramatically reduces the lights' profile and weight, making this Contour Masthead/Anchor Combo Light the slimmest and lightest on the market. Meeting USCG and NMMA C5 2021 standards, rated to 3 nautical miles the Contour Masthead/Anchor Combo Light is available in a 12" and 39" (1m) length with three mounting options – a motorized base, manual folding base, and antenna mount. Available with a white or black finish. IP67 compliant.

Anchor Light

The Contour Anchor Light has the slimmest profile of any anchor light in the industry, with a lightweight design and a locking retractable base. The convenient folding base boasts a small footprint, making for easy storage of the light during transportation. Set the light up in a snap with this innovative, simple design, and lock the light into position for worry-free use. Available in 12" and 39" (1M) lengths with a white or black shaft. U.S. Coast Guard approved 2nm.

USCG
COMPLIANT

Drop-in Navigation Light (Port/Starboard/Stem)

Contour's Drop-in series leverages a single, symmetrical universal pocket design that is molded into the hardtop during the manufacturing process, for a low profile with no exposed fasteners. A clean, modern monochromatic finish adds to the seamless integration, with careful consideration given to mating the draft angles and part radii. U.S. Coast Guard approved to 2nm.

Inset Navigation Light (Port/Starboard/Stem)

Designed specifically for custom builders, Contour's Inset series is designed to be inset into the face of a hardtop or pilothouse with no exposed fasteners. Its small appearance makes it almost disappear, but the output is more than large enough to exceed U.S. Coast Guard's 2nm requirements. U.S. Coast Guard approved 2nm for vessels up to 50m/165 feet.

An aerial night photograph of a ship docked at a pier. The ship is illuminated with bright blue lights, and the pier is lit with a series of blue spotlights. A small red boat is visible in the water between the ship and the pier. The scene is reflected in the dark water, and palm trees are visible in the foreground on the left.

Dock & Deck Lighting Systems

Lumitec's Dock and Deck lights deliver the performance, reliability, and overall good looks that only the world-leader in marine lighting could deliver. With plug-and-play solutions for the do-it-yourselfer to a completely customizable modular system for commercial applications, Lumitec's Dock and Deck lighting will dramatically transform any outdoor waterfront space.

4" Dia. X 2.1" D

Mantis™ Dock Lighting Kit

The Mantis Dock Light Kit leverages the cutting-edge Quattro Spectrum underwater light (3 lights included), but adds an innovative zip-mount universal mounting system for ease of installation - lights mount easily to square or round pilings. Select a mesmerizing full-color RGBW crossfade, bright fish-attracting white (2000+ lumens), or virtually any user-selected color output. The 150w power supply is housed in a durable weatherproof enclosure (4 light max) and will conveniently plug into any standard 110vAC GFCI outlet (110vAC only*). All wiring, connectors, light mounts, and hardware are included. 3-year warranty on electrical parts.

SKU	DESCRIPTION	NUMBER OF LIGHTS
101525	Mantis Dock Light Kit (110vAC only)	3
101526	Mantis Dock Light Add-On Light	1
101527	Mantis Dock Light 50' Cable Extension Kit	N/A

* The Mantis Dock Light Kit can only be connected to 110vAC and not 220vAC. 220vAC custom kits are available upon request. Contact your sales representative for more product information.

The Mantis Dock Light Kit leverages SeaBlaze Quattro technology. Refer to the underwater light section for specifications on this light.

Wireless Control

Kraken™ Dock Lighting System

The Kraken Dock Lighting System is carefully designed to be powerful and robust enough for most commercial applications, but versatile enough for larger residential installations. One Kraken Command Box (110vAc or 220vAC compatible) powers and controls up to six (6) Kraken underwater lights (sold separately), each outputting more than 6,000 lumens (white output). Kraken underwater lights are based on our field-proven SeaBlazeX2 platform and are available in dual-color white/blue, or full-color RGBW output. Add the Nautilus Piling Light and Scallop Pathway Light for walkways and decks, and control it all from your smartphone, tablet, or connected smart device.

SKU	DESCRIPTION	NUMBER OF LIGHTS
101636	Kraken Dock Light - Dual-Color white/blue	1
101637	Kraken Dock Light - RGBW Spectrum	1
101638	Kraken Command Box (with Poco)	N/A
101680	Kraken Secondary Box (no Poco)	N/A

The Kraken Dock Light System leverages SeaBlazeX2 technology. Refer to the underwater light section for specifications on this light.

Scallop

Surface Mount Pathway Light

With a sleek, low-profile design Lumitec's Scallop Pathway Light is the world's first ADA-compliant, PLI-compatible, dock, and pathway light. The carefully engineered beam-angle minimizes glare while illuminating walkway surfaces. Scallop is available in a hand-polished 316 stainless steel or hand-polished bronze finish. Choose from warm white or RGBW full-color output. The Scallop light is PLI and TTP enabled, meaning it can be added to a Mantis dock light kit or designed into a Kraken dock light system. Completely watersealed and IP67 compliant.

Lumitec Limited Warranty

Our products are warranted to be free from defects in workmanship and materials for a period of three (3) years from the date of original purchase. Should your Lumitec product prove defective during the warranty period, promptly notify Lumitec and return product with freight prepaid. Lumitec will, at its option, repair or replace the product without charge for parts or labor or refund purchase price. Products repaired or replaced under this warranty shall be warranted for the unexpired portion of the warranty applying to the original product(s). Lumitec is not responsible for product failure caused by abuse, neglect, improper installation, or failure in applications other than those for which it was designed, intended, and marketed. No warranty or affirmation of fact, express or implied, other than as set forth in the limited warranty statement above is made or authorized by Lumitec. Any liability for consequential and incidental damages is expressly disclaimed. Lumitec liability in all events is limited to, and shall not exceed, the purchase price paid.
