

AN5516-04 Mini Hybrid Platform

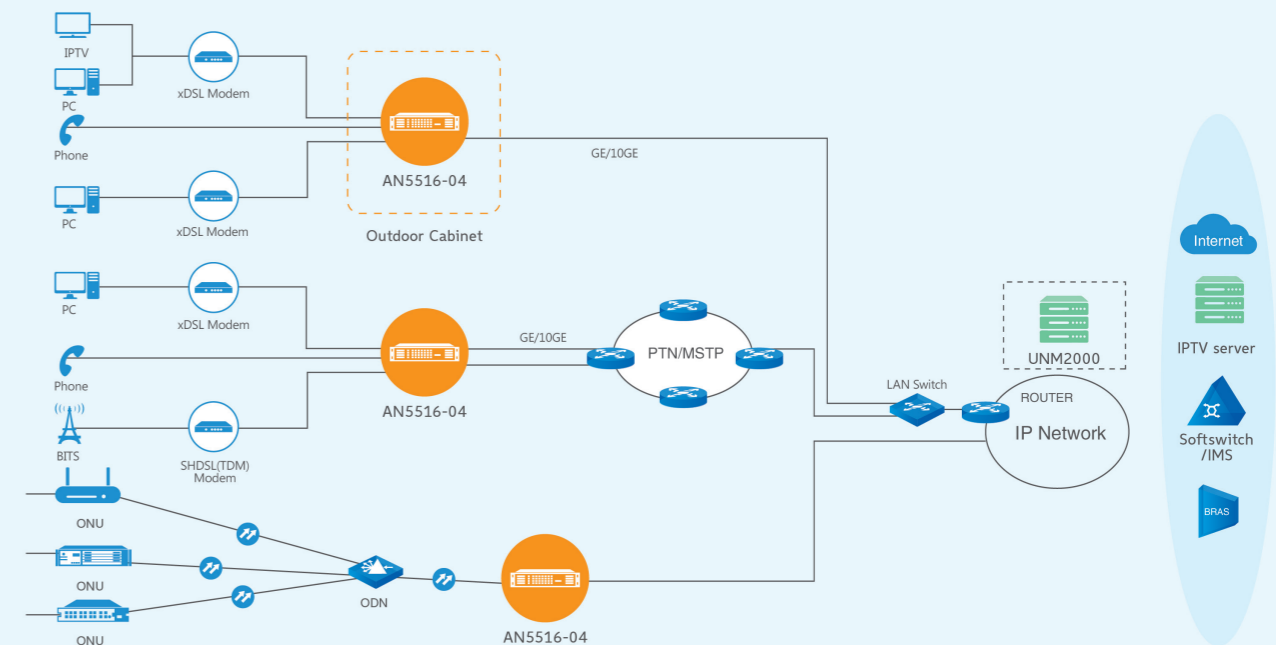

AN5516-04

• Introduction

AN5516-04 Hybrid Platform produced by FiberHome is one of the most advanced FTTx equipment. The AN5516-04 is a carrier class Hybrid Platform equipment with large capacity. The AN5516-04 provides MSAN/GPON/10G PON/P2P user interfaces and GE/10GE uplink interfaces.

• Typical Application Scenarios

• Key Features and Benefits

Unified platform for EPON/GPON/10G PON/P2P
Sharing service cards with AN5116-06B
Up to 32 PON ports per chassis
Flexible uplink card 2*10GE+2*GE/1*STM-1/32*E1
Synchronization features
High precision sync-Ethernet & 1588v2
1PPS+ToD output
Reliability features
Core card 1+1 redundancy
OSPF dual homing
STP/RSTP/MSTP ring protection
Trunk/LACP for uplink protection
