BOSS II

A Non-Intrusive Method of Detecting Objects
Concealed in Body Cavities.

BOSS II Makes prisons safer for inmates and staff.

Since 1996, Ranger Security's B.O.S.S. (Body Orifice Security Scanner) Chairs have been used in some of the toughest jails and prisons in America to detect unwanted metallic contraband objects hidden within the body cavities of detainees and inmates.

After close collaboration with correctional facilities across the United States, Ranger has implemented new features into the BOSS II to further meet and exceed the rigorous demands correctional facilities require.

- ⊕ Proven Effective in America's Toughest Prisons
