

# WAVE UDIMM DDR4

## Introduction

Hiksemi memory module U100 WAVE is a DDR4 memory module, which is made of original high-quality particles and mature production technology, which makes it more compatible, stable and cost-effective. Can be widely used in PC installations, various high-bandwidth, high-performance system applications

## Features

- Cost-effective  
Adopt original granules to make the system run stably and perform better
- Good compatibility  
Better compatibility, compatible with more products after Hikvision optimization
- Ultra high performance  
Dealing with various complex scenes calmly

## Ordering Information

| Capacity | Model          |
|----------|----------------|
| 8G*2     | HSC416U36A02Z4 |
| 16G*2    | HSC432U36A02Z4 |

### Note

Please contact the local sales for detailed model information.

## Specification

| Name                    | WAVE UDIMM DDR4                 |      |
|-------------------------|---------------------------------|------|
| Capacity                | 8GB                             | 16GB |
| Interface               | DDR4                            |      |
| frequency               | 3600MHz                         |      |
| Voltage                 | 1.35V                           |      |
| Pin                     | 288pin                          |      |
| PCB Size(L×W×H mm)      | 133.25*31.25*1.4                |      |
| Operation temperature   | 0 °C to 85 °C (32 °F to 185 °F) |      |
| Limited warranty period | Lifetime warranty               |      |
| Weight                  | 83g*2                           |      |

## Revision History

| Version | Description | Date     |
|---------|-------------|----------|
| V1.0    | U100 WAVE   | 20221215 |
