

Cambium Networks™

cnPilot e700 Enterprise Outdoor

Intended Use

The Cambium Networks cnPilot Enterprise Outdoor series (E-Series) of radio products supports data transmission over Point-to-MultiPoint (PMP) microwave links. This radio equipment is intended for professional applications for fixed outdoor installations only. These outdoor radios contain an integrated antenna.

Cambium Networks Ltd, Unit B2 Linhay Business Park, Eastern Road
Ashburton, Devon, TQ13 7UP, United Kingdom

Informations de sécurité du produit

- Veuillez vous conformer aux règles de sécurité suivantes :
- S'assurer que l'unité extérieure et la structure sur laquelle elle est montée sont capables de résister aux vitesses de vent maximales du site proposées.
- S'assurer de toujours mettre hors tension et débrancher l'équipement avant l'entretien. L'alimentation du cnPilot est utilisée pour le démontage primaire. Cet équipement ne contient aucune pièce réparable.
- De forte chance de rayonnement radio (RF) sont présents près de l'antenne lorsque l'émetteur est en marche. Toujours mettre hors tension l'appareil cnPilot série E avant d'entreprendre des activités de maintenance devant l'antenne.
- Respecter la limite de distance minimale de sécurité pour les produits série E indiquée ci-dessous.
- S'assurer que l'équipement est installé dans une position permettant d'éviter tout risque de radiation chez l'homme.
- Faire une attention lors des travaux en hauteur. Suivre les normes nationales de « travaux en hauteur ». Faire appeler un personnel formé et « compétent ».
- Être extrêmement prudent lors de travaux près de lignes électriques.
- Les appareils cnPilot série E et les structures de montage doivent être correctement mis à la terre afin de les protéger contre la foudre. Il est de la responsabilité de l'utilisateur d'installer l'équipement conformément aux réglementations nationales. Il est recommandé de faire effectuer l'installation par un installateur professionnel.
- Toujours utiliser les unités d'alimentation (PSU) spécifiées de la plate-forme cnPilot série E pour alimenter l'équipement. N'utilisez pas les PSU fournis par Cambium pourrait endommager l'équipement et entraîner un risque pour la sécurité.
- Les structures, l'équipement et les personnes doivent être protégés contre les décharges électrostatiques :
 - en situant les équipements dans une zone de protection contre la foudre et les éclairs;
 - par l'instillation de paratonnerres appropriés à la conduite du courant de surcharge vers la masse via un chemin solide préférable.
- L'enveloppe de l'unité extérieure peut être chaude au toucher lorsqu'elle est en marche.
- Le sacoche peut être compromise si des câbles non prévus pour l'extérieur sont utilisés pour les connexions qui seront exposées à l'environnement extérieur. Installer les câbles Cambium recommandés.

Opération au sein de l'UE

Bandes de fréquences, Puissance maximale de fonctionnement, Distance de sécurité

Au sein de l'UE, Les produits cnPilot série E bi-bande 2,4 GHz / 5 GHz fonctionnent sur les bandes de fréquences suivantes jusqu'à la puissance maximale indiquée:

Bandes de fréquences de fonctionnement	Norme UE	Limite de puissance maximale (PIRE)	Usage permis	Unités prenant en charge cette bande de fréquences
2401 – 2483 MHz	EN 300 328	100 mW/ 20 dBm	Disponible pour usage général dans tous les pays de l'UE	Toutes les cnPilot séries E
5470 – 5725 MHz	EN 301 893	1 Watt / 30 dBm	Disponible pour usage général dans tous les pays de l'UE	Toutes les cnPilot séries E

Pour les produits cnPilot série E déployés au sein de l'UE, la distance minimale de sécurité entre l'équipement et les personnes est de 12 cm.

Restrictions et exigences pour l'autorisation d'utilisation:

- Les produits de cnPilot série E peuvent être configurés pour fonctionner sur des bandes de fréquences sans licence, sous réserve de la planification des fréquences de chaque pays. Les opérateurs/utilisateurs doivent s'assurer que l'équipement est installé et exploité conformément à la réglementation en vigueur dans le pays d'opération.

Déclaration de conformité de l'UE simplifiée:

Par les présentes, le fabricant Cambium Networks Ltd, déclare que les équipements radio type cnPilot e700 sont en conformité avec la Directive 2014/53/UE. Le texte complet de la déclaration de conformité de l'UE est disponible à l'adresse Internet suivante : http://www.cambiumnetworks.com/eu_dofc

Directive Déchets d'Équipements Électriques et Electroniques (DEEE)

Merci de ne pas jeter l'équipement électronique et électrique ou les accessoires électroniques et électriques, ou vos déchets électroniques. Dans certains pays ou régions, des systèmes de collecte ont été mis en place pour gérer les déchets d'équipements électriques et électroniques. Dans les pays de l'Union européenne, veuillez contacter votre représentant local fournisseur d'équipements ou votre Centre d'assistance Cambium Networks pour plus d'informations sur le système de collecte des déchets de votre pays.

For in der EU eingesetzte Geräte der cnPilot E-Serie beträgt der minimale Sicherheitsabstand zwischen Gerät und Mensch 12 cm.

Installation & Operation

Installation and operation of this product is complex. Cambium therefore recommends professional installation and management of the system to ensure that operation complies with the regulations of the region where the product is installed. Please follow the instructions in this leaflet. Further guidance on installation and operation is available in the product user guide, see web-link on the front cover of this leaflet.

The installer must have sufficient skills, knowledge and experience to perform the installation task and is responsible for the safety of the installation.

- Familiarity with current applicable national regulations including radio regulations, electrical installation regulations, surge protection regulations and 'working at heights' regulations

Confirming that the equipment settings are compliant with national or regional regulations. Please observe the following important instructions during installation. This will set the equipment in compliance with national regulatory regulations:

- Ensure that the cnPilot E-Series equipment is fitted with the latest firmware version (System Release 3.x or later). The latest release is available from the Cambium Support Center web site, see link below.
- During equipment set-up, verify that the correct region code is set (the region code is pre-set in the factory for EU products) and then select the correct country code for the particular country where the product is being deployed.

Changes or modifications not expressly approved by Cambium Networks could void the user's authority to operate the equipment and will void the manufacturer's warranty.

Product Safety information - Observe the following safety rules:

- The maximum wind speed at a proposed site to which it is mounted is capable of withstanding the maximum power down and unplug the equipment before servicing. The cnPilot power supply is the primary disconnect device. There are no serviceable parts inside this equipment.
- Strong radio frequency (RF) fields will be present close to the antenna when the transmitter is on. Always turn off the power to the cnPilot E-Series device before undertaking maintenance activities in front of the antenna.
- Observe the minimum safe distance limit for E-Series products provided below.
- Ensure that equipment is installed in a position avoiding any radiation hazard to humans.
- Extreme care when working at heights. Observe national 'working at heights' regulations. Use trained 'competent' staff.
- Extreme care when working near power lines.
- cnPilot E-Series devices and mounting structures must be properly grounded to protect against lightning. It is the user's responsibility to install the equipment in accordance with national regulations. It is recommended that installation be contracted to a professional installer. Structures, equipment and people must be protected against electrical shock.
- by siting equipment in a lightning protection zone
- by installation of appropriate lightning conductors to conduct the surge current to ground via a separate preferential solid path

Always use the specified cnPilot E-Series platform power supply units (PSU) to power the equipment. Failure to use the specified Cambium supplied PSU could result in equipment damage and may cause a safety hazard.

The outdoor unit enclosure may be hot to the touch when in operation.

Safety may be compromised if outdoor rated cables are not used for connections that will be exposed to the environment. Install Cambium recommended cables.

Operation in the EU - Frequency Bands, Maximum Operating Power, Safe distance

In the EU, the 2,4 GHz / 5 GHz dual band cnPilot E-Series series products operate in the following frequency bands up to the maximum power shown:

Operating Frequency Band	EU Standard	Maximum Power Limit (EIRP)	Permitted usage	Units that support this frequency band
2401 – 2483 MHz	EN 300 328	100 mW/ 20 dBm	Available for general usage within all EU nations	All cnPilot E-Series
5470 – 5725 MHz	EN 301 893	1 Watt / 30 dBm	Available for general usage within all EU nations	All cnPilot E-Series

For cnPilot E-Series products deployed in the EU, the minimum safe distance between the equipment and humans is 12 cm.

Restrictions & requirements for authorization for use

- The cnPilot E-Series products can be configured to operate in unlicensed frequency bands subject to frequency planning within individual countries. Operators / End users must ensure that the equipment is installed and operated in accordance with the regulations applicable to the country of operation.
- Safety may be compromised if outdoor rated cables are not used for connections that will be exposed to the environment. Install Cambium recommended cables.
- Operation in the EU - Frequency Bands, Maximum Operating Power, Safe distance

In this equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to correct the interference by turning the equipment off and on.

Important Note:

FCC Radiation Exposure Statement:

This equipment complies with FCC radiation exposure limits set forth for an uncontrolled environment. This equipment should be installed and operated with minimum distance 20 cm (7.87 inches) between the radiator & your body.

The equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules.
