

RJ45 CONECTOR CAT5E

color	Low quality connector : connector color is not translucence High quality connector : connector color is more translucence
Working time	Low quality Connector : the times of plugging and unplugging is short . Around 400 times will be broken . Nice connector : the times of plugging and unplugging can be more than 2000 times.
Working time	"U" is about the thickness of the Gold plating. The connector signal transmission quality based on the thickness of Gold Plating."U" is more thick , the price is more high, But quality is more good .

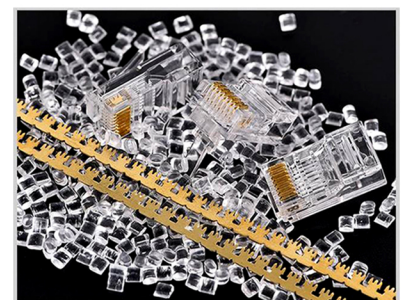

- 1) All modular plugs RJ11 RJ12 RJ45 connectors are available: 8P8C, 8P4C, 6P4C, 6P2C, 4P4C, 4P2C; RJ11/RJ12/RJ45/RJ48 connector, UTP/FTP/STP/SFTP/SSTP, color modular plugs, or UK plugs are all available.
- 2) Gold plating thickness: gold flash, FU,01,03, 06, 15, 30, 50U”.
- 3) UL/RoHS compliant.
- 4) Imported materials:
Imported polycarbonate material with good transparency and flexibility.
- 5) Designed according to FCC standard, and fully compatible with different jacks.
- 6) Standard packing: 1000pcs or 100pcs/bag with a sticker to mark specification.
