## Strip & Crimp Tool for Modular Plugs

The Belden Cable Pro Strip and Crimp tool is designed as a multi-functional tool with the ability to cut, strip and terminate category cable for RJ11 and RJ45 modular plug installations. The tool features a cable stop to ensure a precise ¼" or ½" prep to the cable depending on the job requirement and user preference. Installation is quick and easy to manage, since there is no need to carry multiple tools or die sets with the Strip and Crimp tool.

- Cuts, strips and terminates category cable without changing die sets or tools
- Terminates RJ11 and RJ45 modular plugs
- Short cable stop creates ¼" cable prep
- Long cable stop creates ½" cable prep
- Comfort-grip handles
